

NACOS MAPOLY 2024/2025

ND Tech Quiz: ND 1 vs ND 2

Q 1 - The type of computer, which has the properties of both i.e. analogue computer and digital computer, is known as

- A - Analogue-cum Digital Computer
- B - Super Computer
- C - **Hybrid Computer - Answer**
- D - Computer of Future

Q 2. Which of the following is not an operating system?

- A. Windows
- B. Linux
- C. **Oracle - Answer**
- D. macOS

Q 3 - A sort of malware computer program that keeps replicating itself and can easily get diffused into other computers through internet is known as ...

- A - Virus
- B - **Worms - Answer**
- C - Trojans
- D - Spyware

Q 4 - Which among the following period is known as the era of second generation computer?

- A - 1971 to 1980
- B - 1976 to 1985
- C - **1990 to 2000 - Answer**
- D - 1982 onwards

Q 5 - Who among the following has designed the Java programming language?

- A - Rasmus Lerdorf
- B - Guido van Rossum
- C - Brendan Eich

D - **James Gosling – Answer**

Q 6 - Which among the following is known as point-and-draw device?

A - Keyboard

B - Scanner

C – **Mouse - Answer**

D – CPU

Q 7 - Node is a connection or junction point in a computer networking system.

A - False

B – **True - Answer**

Q 8 - Which among the following was the first computer virus?

A - Conifer

B - I Love you

C - Melissa

D – **Elk – Answer**

Q 9. Which device is used to connect to the internet?

A. Flash

B. Scanner

C. **Router - Answer**

D. Printer

Q 10. The software, which can be used on an installed operating system, is known as ...

A. Internet

B. **Application Software - Answer**

C. Operating System

D. All of the above

Q 11. An example of programming language that interact directly with processor is known as ...

A. High Level Language

B. **Assembly Language - Answer**

C. Programming Language

D. System Software

Q 12. Which of the following might be done offline?

A. **Passport Application - Answer**

B. E-commerce Transactions

C. Instant Messaging

D. Video Conferencing

Q 13. This technique provides facility to store and execute more than one program in the Central Processing Unit (CPU) simultaneously?

A. Real Time Processing

B. **Multiple Processing - Answer**

C. Time Sharing Processing

D. Many to Many Processing

Q 14 is a blueprint that pictorially represents the algorithm and its steps?

A. Algorithm

B. System Diagram

C. **Flowchart - Answer**

D. Data Analysis

Q 15 is a private network organization, which is actually the part of respective company's intranet and its services are extended to users outside the company.?

A. Internet

B. **Extranet - Answer**

C. Intranet

D. Networking

Q 16 ----- is computer system has high capacity to integrate different media including text, image, graphics, audio, and video?

A. Computer

B. Software Packages

C. **Multimedia - answer**

D. Computer System

Q 17 - The programs machine instructions are store in ___ memory segment.

A - Data

B - Stack

C - Heap

D – **Code - Answer**

Q 18 - ----- is a proper technique that illustrates the right solution in logical and feasible steps.

A - Data

B – Coding

C – **Algorithm - Answer**

D – Graph

Q 19 - ----- is depending upon the power of the computer, it can perform, it can take Millions of instructions per second.

A - Diligence

B – Memory

C – Storage

D – **Speed – Answer**

Q 20 In 1822, who developed a machine capable to calculate the successive difference of expression and prepared a table which helped him in his calculations.

A – Lady Ada Lovelace

B – **Charles Babbage - Answer**

C – Blaise Pascal

D – John Napier

ND Fill in the Gap Questions (20)

ND 1 vs ND 2

Section B: Fill in the Gap Questions (20 Questions)

1. The physical components of a computer system are called _____. Answer: **Hardware**

2. A _____ is a set of instructions that tells the computer what to do. Answer: **Program**
3. The brain of the computer is the _____. Answer: **CPU (Central Processing Unit)**
4. _____ is the process of finding and fixing errors in software code. Answer: **Debugging**
5. Microsoft Word is an example of a(n) _____ software Answer: Word Processing

Application

6. The _____ is the standard output device of the compute. Answer: **Monitor**
7. A collection of related web pages is known as a _____. Answer: **Website**
8. The shortcut key to undo an action in Microsoft word is _____. Answer: **Ctrl + Z**
9. _____ memory stores data temporarily and is volatile .Answer: **RAM (Random Access Memory)**
10. The smallest unit of data in a computer is called a _____. Answer: **Bit**
11. A _____ connects computers within a limited area like a school or office. Answer: **LAN (Local Area Network)**
12. A _____ is used to connect different networks together. Answer: **Router**
13. The full meaning of URL is _____. Answer: **Uniform Resource Locator**
14. _____ is the process of converting source code into machine code. Answer: **Compilation**
15. In programming, a _____ is used to store data values. Answer: **Variable**
16. The keyword used to display output in C language is _____. Answer: **printf()**
17. _____ Software helps protect computers from viruses. Answer: **Antivirus**
18. The command used to create a directory in Command Prompt is _____. Answer: **mkdir**
19. The binary number system is made up of _____ and _____. Answer: **0 and 1**
20. The protocol used to transfer files over the Internet is _____. Answer: **FTP (File Transfer Protocol)**
