1.0 EXECUTIVE SUMMARY

ELITE (Group 12) is a partnership group made up of 5 members who came together to carry out a special project titled **WIFI Installation**. The goal of this project is to provide Students and Staffs access to fast and reliable wireless internet.

Our mission as a group is to become a symbol of innovation by implementing affordable and accessible internet solutions. **ELITE** is committed to quality service, teamwork, and effective project execution.

The main beneficiaries of this project are Staffs of MAPOLY especially Mapced, who often face difficulties accessing reliable internet for academic purposes. Our strategy involves direct engagement, technical support, and awareness campaigns.

2.0 BUSINESS DESCRIPTION AND VISION

2.1 MISSION STATEMENT

Due to the increasing need for reliable internet access in educational institutions, **ELITE** aims to provide fast and affordable WiFi installation services within the Moshood Abiola Polytechnic community. This project is designed to enhance digital access for students, staff, and nearby residents, improving academic research, communication, and productivity.

2.2 COMPANY VISION

Our vision is to become a recognized leader in affordable, accessible, and reliable WiFi installation services across campuses and communities, starting with MAPCED.

2.3 BUSINESS GOALS AND OBJECTIVES

1. To provide consistent and high-speed internet access within MAPOLY.
2. To enhance digital learning and research capabilities for students.
3. To offer affordable WiFi installation services that meet current technological needs.
4. To empower students with digital tools for academic success.

BUSINESS REVENUE

The revenue for subsequent production individual member of the group is expected to contribute in order to have specific amount required for the project

BATCH	QUANTITY	UNIT COST	TOTAL COST	UNIT SELLING	TOTAL REVENUE	PROFIT
1						
2						
3						
TOTAL						

PROFIT SHARING RATIO

IF

Profit = Total Revenue - Total Cost

~~₦~~ - ~~₦~~

= ~~₦~~

THEN

MAPCED 30% PROFIT

30/100 X ~~₦~~ = ~~₦~~

GROUP 70% PROFIT

70/100 X ~~₦~~ = ~~₦~~

MEMBERS 100% PROFIT SHARE

20/100 X ~~₦~~ = ~~₦~~

SOURCE CAPITAL

Capital was source from the members of the group in order to carry out the business, that is the five (5) entrepreneurs and the capital will be used in the purchased of the materials

2.4 LIST OF TEAM MEMBERS AND THEIR ROLES

S/N	NAME	MATRIC NO	ROLE
1.	AFOLABI TAIWO ABAYOMI	19/69/0053	Group Leader
2.	OJELADE ESTHER FOLASHADE	19/69/0145	Ass. Group Leader
3.	BALOGUN ADEDAYO OLUWAFEMI	19/69/0132	Project Manager
4.	MUSTAPHA AKOREDE AHMED	19/69/0033	Treasurer
5.	ANIMASHAUO YUSUF	19/69/0102	Financial Secretary

3.0 PROJECT REQUIREMENTS AND PROCEDURE

3.1 PROJECT DESCRIPTION

The WiFi Installation project is a technical and service-oriented initiative focused on setting up wireless internet networks within educational and residential areas. It involves planning, hardware installation, configuration, and maintenance to ensure users have uninterrupted access to the internet.

3.2 PROJECT REQUIREMENTS / MATERIALS

1. Wireless Routers
2. Network Cables (Ethernet)
3. Power Backup (e.g., UPS or Inverter)
4. Network Switches
5. Wall Mounts and Cable Trays
6. Configuration Software
7. ISP Subscription

3.3 PROJECT PROCEDURE

1. **Site Assessment:** Inspect location and determine internet needs
2. **Material Procurement:** Purchase necessary hardware and software

3. **Installation:** Set up routers, switches, and cabling
4. **Configuration:** Optimize network settings for speed and coverage
5. **Testing:** Ensure system stability and connection quality
6. **User Training:** Educate users on access and troubleshooting
7. **Maintenance Plan:** Ensure long-term service support

4.0 MARKETING AND STRATEGIES

HORIZON will implement the 4Ps of marketing:

Price: Affordable pricing to compete with commercial providers

Place: Service focus within MAPCED

Promotion: Word of Mouth

Product (Service): Stable, high-speed WiFi tailored for students and staff

4.1 MARKET SEGMENTATION

1. Students
2. Staff and departments
3. ICT Labs and Libraries

4.2 TARGET MARKET

1. MAPOLY Students
2. Academic and non-academic staff
3. School departments

4.3 MARKETING STRATEGIES

1. Partnering with school ICT departments
2. Trial/demo installations
3. Flexible subscription packages

5.0 FINANCIAL MANAGEMENT

5.1 START-UP CAPITAL

Total capital required = ₦

Each of 5 members contributes ₦7,500

5.2 COST BREAKDOWN

ITEM	QUANTITY	UNIT COST (₦)	TOTAL COST (₦)
Wireless Router			
Ethernet Cables			
Switches			
Power Backup (UPS)			
Tools & Materials			
Promotion & Publicity			
Total			

5.3 REVENUE PROJECTION

Expected sales:

Projected profit:

6.0 NAME AND SIGNATURE OF GROUP MEMBERS

7.0 CONCLUSION

The successful completion of our WiFi installation project marks a significant step toward enhancing connectivity and digital access. Through detailed planning, careful implementation, and collaborative effort, Group ELITE has provided a stable and efficient wireless network solution that meets modern communication needs. This project not only highlights the importance of

reliable internet access but also reflects our team's dedication to innovation and technical excellence.
